LIST OF RELATED APPLICATIONS This is a combined Continuation of U.S. application Ser. No. 08/641,010, filed on Apr. 29, 1996, and entitled "COMPUTER-IMPLEMENTED TRANSPORT OF ELECTRONIC INFORMATION OBJECTS," which is a Continuation-in-Part of U.S. application Ser. No. 08/251,724, filed on May 31, 1994, and entitled "SYSTEM FOR AUTOMATIC UNATTENDED ELECTRONIC INFORMATION TRANSPORT BETWEEN A SERVER AND A CLIENT BY A VENDOR PROVIDED TRANSPORT SOFTWARE WITH A MANIFEST LIST," which as U.S. Pat. No. 5,694,546 on Dec. 2, 1997, and U.S. application Ser. No. 08/982,157, filed on Dec. 1, 1997, and entitled "COMPUTER-IMPLEMENTED TRANSPORT OF ELECTRONIC INFORMATION OBJECTS," which is a Continuation of the aforementioned Ser. No. 08/251,724 (U.S. Pat. No. 5,694,546). All of the above-identified applications are incorporated herein by reference in their entirety.

ART-UNIT: 3625

PRIMARY-EXAMINER: Rosen; Nicholas David

ABSTRACT:

An online Gift Registry Service provides registration of information for a gift registrant and allows access to the registry by potential gift giver users. In addition, users can tag items of interest at participating Service Provider (SP) sites and the SP sites will register these items with the Gift Registry Service on the user's behalf. It further provides a streamlined checkout process for

purchasing these gift items with the registered SP sites (e.g. World Wide Web sites) over a distributed public network. Users and Service Providers (SP) initially register with the Gift Registry Service and are provided additional functionality. For users, a reminder service is provided to notify individuals automatically upon the trigger of certain events, such as important dates or product sales from online merchants. In addition, there are various occasion planning services available such as distribution lists, discussion groups, and other related resources for multiple events including weddings, baby showers, etc. These other resources include sending out announcements, reserving halls, and contracting services of related businesses for the occasion. A distinct advantage of this system is that users can perform all the planning for the event online in the comfort of their home or office. Service Providers on the other hand, can register system notification messages to be triggered on pre-determined events. In addition, Service Providers can obtain marketing information to tailor their products and services.

ABSTRACT:

A system, method and article of manufacture are provided for collaborative installation management in a network-based supply chain environment. According to an embodiment of the invention, telephone calls, data and other multimedia information are routed through a network system which includes transfer of information across the internet utilizing telephony routing information and internet protocol address information. The system includes integrated Internet Protocol (IP) telephony services allowing a user of a web application to communicate in an audio fashion in-band without having to pick up another telephone. Users can click a button and go to a call center through the network using IP telephony. The system invokes an IP telephony session simultaneously with the data session, and uses an active directory lookup whenever a user uses the system. Users include service providers and manufacturers utilizing the network-based supply chain environment.
